

VOLUME XIV, PART II.

SUBJECT INDEX.

A

Adoption of Standards.

A Critical Review of the Procedure Governing the —. Edgar Marburg, 639. Discussion, 649.

Aggregates (see also Concrete).

Blast-Furnace Slag as Aggregate in Concrete. W. A. Aiken, 280. Discussion, 288.

Proportioning — for Portland-Cement Concrete. Albert Moyer, 255. Discussion, 267.

Testing Concrete —. Cloyd M. Chapman, 298. Discussion, 304.

Alloy Steels.

Magnetic Habits of —. J. A. Mathews, 50. Discussion, 67.

Analysis.

Method of Sampling and — of Tin, Terne and Lead-Coated Sheets. J. A. Aupperle, 162. Discussion, 169.

Asphalts.

Methods for Determining the Melting Points of —. J. G. Miller and P. P. Sharples, 502.

Autoclave.

Additional Results Obtained with the — Test for Portland Cement. H. J. Force, 246. Discussion, 252.

Axial Strainometer.

An Improved Type of —. Arthur C. Alvarez, 520. Discussion, 531.

Axle.

A Failed—: Study of an Internal Transverse Fissure. Robert Job, 76. Discussion, 84.

B

Bars.

The Use of Turned Sections in Tension Tests of Reinforcing —. E. P. Withrow and L. C. Niedner, 90. Discussion, 107.

Beams.

Relation between Deformation and Deflection in Reinforced-Concrete —. G. A. Maney, 310.

Belting.

Rubber — and Methods of Testing. W. E. Campbell, 617. Discussion, 624.

Blast-Furnace Slag.

— as Aggregate in Concrete. W. A. Aiken, 280. Discussion, 288.

VOLUME XIV, PART II.

SUBJECT INDEX.

A

Adoption of Standards.

A Critical Review of the Procedure Governing the —. Edgar Marburg, 639. Discussion, 649.

Aggregates (see also Concrete).

Blast-Furnace Slag as Aggregate in Concrete. W. A. Aiken, 280. Discussion, 288.

Proportioning — for Portland-Cement Concrete. Albert Moyer, 255. Discussion, 267.

Testing Concrete —. Cloyd M. Chapman, 298. Discussion, 304.

Alloy Steels.

Magnetic Habits of —. J. A. Mathews, 50. Discussion, 67.

Analysis.

Method of Sampling and — of Tin, Terne and Lead-Coated Sheets. J. A. Aupperle, 162. Discussion, 169.

Asphalts.

Methods for Determining the Melting Points of —. J. G. Miller and P. P. Sharples, 502.

Autoclave.

Additional Results Obtained with the — Test for Portland Cement. H. J. Force, 246. Discussion, 252.

Axial Strainometer.

An Improved Type of —. Arthur C. Alvarez, 520. Discussion, 531.

Axle.

A Failed—: Study of an Internal Transverse Fissure. Robert Job, 76. Discussion, 84.

B

Bars.

The Use of Turned Sections in Tension Tests of Reinforcing —. E. P. Withrow and L. C. Niedner, 90. Discussion, 107.

Beams.

Relation between Deformation and Deflection in Reinforced-Concrete —. G. A. Maney, 310.

Belting.

Rubber — and Methods of Testing. W. E. Campbell, 617. Discussion, 624.

Blast-Furnace Slag.

— as Aggregate in Concrete. W. A. Aiken, 280. Discussion, 288.

Body in Varnish.

Quantitative Determination of Body and Solvent in Varnish. A. L. Brown, 466.

Brinell.

Hardness Tests: Relation between — Ball-Test and Scleroscope Readings. J. J. Thomas, 72. Discussion, 75.

C

Cast Iron.

Notes on Chilled —. E. B. Tilt, 110. Discussion, 121.

Castings.

Study of the Strength of Non-Ferrous —: Comparison of Different Test Specimens. L. P. Webbert, 145. Discussion, 159.

Cement (see also **Concrete**).

Additional Results Obtained with the Autoclave Test for Portland —.

H. J. Force, 246. Discussion, 252.

Errors in the Methods of Determining the Time of Setting of —. G. M. Williams, 172. Discussion, 194.

Paint Protection for Portland- — Surfaces. H. A. Gardner, 482. Discussion, 491.

Proportioning Aggregates for Portland- — Concrete. Albert Moyer, 255. Discussion, 267.

Volume Changes in Portland — and Concrete. A. H. White, 203. Discussion, 242.

Chilled Cast Iron.

See **Cast Iron**.

Chinese Wood Oil.

See **Wood Oil**.

Clay.

A Machine for Testing — Products. Mont Schuyler, 557.

Coatings.

A Rational Test for Metallic Protective —. J. A. Capp, 474. Discussion, 479.

Compression Machine.

A Simple — for Testing Structural Materials. William O. Lichtner, 535.

Concrete (see also **Cement**).

Blast-Furnace Slag as Aggregate in —. W. A. Aiken, 280. Discussion, 288.

Examination of — Failures for Their Determining Causes. R. S. Greenman, 321. Discussion, 329.

Proportioning Aggregates for Portland-Cement —. Albert Moyer, 255. Discussion, 267.

Relation between Deformation and Deflection in Reinforced- — Beams. G. A. Maney, 310.

Concrete (Continued):

- Testing — Aggregates. Cloyd M. Chapman, 298. Discussion, 304.
Volume Changes in Portland-Cement and —. A. H. White, 203. Discussion, 242.

D**Deflection.**

- Relation between Deformation and — in Reinforced-Concrete Beams.
G. A. Maney, 310.

Deformation.

- Relation between — and Deflection in Reinforced-Concrete Beams.
G. A. Maney, 310.

Dies.

- An Efficiency Testing Machine for Testing Drills, Taps and —. T. Y. Olsen, 541.

Drills.

- An Efficiency Testing Machine for Testing —, Taps and Dies. T. Y. Olsen, 541.

E**Errors.**

- in the Methods of Determining the Time of Setting of Cement.
G. M. Williams, 172. Discussion, 194.

F**Failures.**

- Examination of Concrete — for Their Determining Causes. R. S. Greenman, 321. Discussion, 329.

Fissure.

- A Failed Axle: Study of an Internal Transverse — Robert Job, 76.
Discussion, 84.

Friction Testing Machine.

- An Autographic — for Testing Mechanical Rubber Goods. J. M. Bierer, 627. Discussion, 634.

G**Glue.**

- Specifications and Tests of —. Oscar Linder and E. C. Frost, 508.

H**Hardness.**

- Tests: Relation between Brinell Ball-Test and Scleroscope Readings.
J. J. Thomas, 72. Discussion, 75.

I**Iron.**

- Notes on Chilled Cast —. E. B. Tilt, 110. Discussion, 121.

L

Lead-Coated Sheets.

Method of Sampling and Analysis of Tin, Terne and —. J. A. Aupperle, 162. Discussion, 169.

Lime.

Strength of — Mortar. W. E. Emley and S. E. Young, 338.

M

Machines.

See **Testing Machines.**

Magnetic Habits.

— of Alloy Steels. J. A. Mathews, 50. Discussion, 67.

Melting Points.

Methods for Determining the — of Asphalts. J. G. Miller and P. P. Sharples, 502.

Metallic Protective Coatings.

See **Protective Coatings.**

Methods of Testing (see also **Testing, Testing Machines, Tests**).

Errors in the Methods of Determining the Time of Setting of Cement. G. M. Williams, 172. Discussion, 194.

Method of Sampling and Analysis of Tin, Terne and Lead-Coated Sheets. J. A. Aupperle, 162. Discussion, 169.

Methods for Determining the Melting Points of Asphalts. J. G. Miller and P. P. Sharples, 502.

Rubber Belting and —. W. E. Campbell, 617. Discussion, 624.

Mortar.

Strength of Lime —. W. E. Emley and S. E. Young, 338.

N

Non-Ferrous Castings.

Study of the Strength of —: Comparison of Different Test Specimens. L. P. Webbert, 145. Discussion, 159.

Non-Ferrous Materials (see also **Lead-Coated Sheets**).

Considerations Affecting Specifications for Wrought —. W. Reuben Webster, 127. Discussion, 141.

O

Oil.

Examination of Chinese Wood —. E. E. Ware and C. L. Schumann, 454. Discussion, 464.

Overstrain.

Are the Effects of Simple — Monotropic? Henry M. Howe, 7. Discussion, 36.

P**Paints** (see also **Oil, Protective Coatings, Varnish**).

Paint Protection for Portland-Cement Surfaces. H. A. Gardner, 482. Discussion, 491.

Report on a Permeability Test for — and Varnishes. A. M. Muckenfuss, 359. Discussion, 426.

Permeability.

Report on a — Test for Paints and Varnishes. A. M. Muckenfuss, 359. Discussion, 426.

Portland Cement.

See **Cement**.

Proportioning.

— Aggregates for Portland-Cement Concrete. Albert Moyer, 255. Discussion, 267.

Protection.

Paint — for Portland-Cement Surfaces. H. A. Gardner, 482. Discussion, 491.

Protective Coatings.

A Rational Test for Metallic —. J. A. Capp, 474. Discussion, 479.

R**Reinforced Concrete.**

See **Concrete**.

Reinforcing Bars.

See **Bars**.

Rubber.

An Autographic Friction Testing Machine for Testing Mechanical — Goods. J. M. Bierer, 627. Discussion, 634.

— Belting and Methods of Testing. W. E. Campbell, 617. Discussion, 624.

S**Sampling.**

Methods of — and Analysis of Tin, Terne and Lead-Coated Sheets. J. A. Aupperle, 162. Discussion, 169.

Scleroscope.

Hardness Tests: Relation between Brinell Ball-Test and — Readings. J. J. Thomas, 72. Discussion, 75.

Sections (see also **Specimens**).

The Use of Turned — in Tension Tests of Reinforcing Bars. E. P. Withrow and L. C. Niedner, 90. Discussion, 107.

Setting of Cement.

Errors in the Methods of Determining the Time of —. G. M. Williams, 172. Discussion, 194.

Sheets.

Methods of Sampling and Analysis of Tin, Terne and Lead-Coated —
J. A. Aupperle, 162. Discussion, 169.

Simple Overstrain.

See **Overstrain**.

Slag.

Blast-Furnace — as Aggregate in Concrete. W. A. Aiken, 280. Discussion, 288.

Solvent in Varnish.

Quantitative Determination of Body and —. A. L. Brown, 466.

Specifications.

Considerations Affecting — for Wrought Non-Ferrous Materials.
W. Reuben Webster, 127. Discussion, 141.

— and Tests of Glue. Oscar Linder and E. C. Frost, 508.

Specimens (see also **Sections**).

Study of the Strength of Non-Ferrous Castings: Comparison of Different Test —. L. P. Webbert, 145. Discussion, 159.

Standards.

A Critical Review of the Procedure Governing the Adoption of —.
Edgar Marburg, 639. Discussion, 649.

Steel (see also **Axle, Bars, Hardness, Overstrain**).

Magnetic Habits of Alloy Steels. J. A. Mathews, 50. Discussion, 67.

Strainometer.

An Improved Type of Axial —. Arthur C. Alvarez, 520. Discussion, 531.

Strength.

— of Lime Mortar. W. E. Emley and S. E. Young, 338.

Study of the — of Non-Ferrous Castings: Comparison of Different Test Specimens. L. P. Webbert, 145. Discussion, 159.

Structural Materials.

A Simple Compression Machine for Testing —. William O. Lichtner, 535.

T**Taps.**

An Efficiency Testing Machine for Testings Drills, — and Dies. T. Y. Olsen, 541.

Terne-Coated Sheets.

Methods of Sampling and Analysis of Tin, Terne and Lead-Coated Sheets. J. A. Aupperle, 162. Discussion, 169.

Testing (see also **Methods of Testing, Testing Machines, Tests**).

Rubber Belting and Methods of —. W. E. Campbell, 617. Discussion, 624.

— Concrete Aggregates. Cloyd M. Chapman, 298. Discussion, 304.

Testing Machines (see also **Strainometer, Viscosimeter**).

A Machine for Testing Clay Products. Mont Schuyler, 557.

Testing Machines (Continued):

- A New Vibratory Testing Machine and Results Obtained by Its Use. S. V. Hunnings, 548.
- A Simple Compression Machine for Testing Structural Materials. William O. Lichtner, 535.
- An Autographic Friction Testing Machine for Testing Mechanical Rubber Goods. J. M. Bierer, 627. Discussion, 634.
- An Efficiency Testing Machine for Testing Drills, Taps and Dies. T. Y. Olsen, 541.

Tests (see also Methods of Testing, Testing, Testing Machines).

- A Rational Test for Metallic Protective Coatings. J. A. Capp, 474. Discussion, 479.
- Additional Results Obtained with the Autoclave Test for Portland Cement. H. J. Force, 246. Discussion, 252.
- Hardness —: Relation between Brinell Ball-Test and Scleroscope Readings. J. J. Thomas, 72. Discussion, 75.
- Report on a Permeability Test for Paints and Varnishes. A. M. Muckenfuss, 359. Discussion, 426.
- Specifications and — of Glue. Oscar Linder and E. C. Frost, 508.
- Study of the Strength of Non-Ferrous Castings: Comparison of Different Test Specimens. L. P. Webbert, 145. Discussion, 159.
- The Use of Turned Sections in Tension — of Reinforcing Bars. E. P. Withrow and L. C. Niedner, 90. Discussion, 107.

Time of Setting.

- Errors in the Methods of Determining the — of Cement. G. M. Williams, 172. Discussion, 194.

Tin-Coated Sheets.

- Method of Sampling and Analysis of Tin, Terne and Lead-Coated Sheets. J. A. Aupperle, 162. Discussion, 169.

Transverse Fissure.

See **Fissure.**

Turned Sections.

- The Use of — in Tension Tests of Reinforcing Bars. E. P. Withrow and L. C. Niedner, 90. Discussion, 107.

V**Varnishes.**

- Quantitative Determination of Body and Solvent in Varnish. A. L. Brown, 466.
- Report on a Permeability Test for Paints and —. A. M. Muckenfuss, 359. Discussion, 426.

Vibratory Testing Machine.

- A New — and Results Obtained by Its Use. S. V. Hunnings, 548.

Viscosimeter.

- Viscosity Measurement and a New —. Alan E. Flowers, 565.

Volume Changes.

- in Portland Cement and Concrete. A. H. White, 203. Discussion, 242.

W

Wood Oil.

Examination of Chinese —. E. E. Ware and C. L. Schumann, 454.
Discussion, 464.

Wrought Non-Ferrous Materials.

Considerations Affecting Specifications for —. W. Reuben Webster,
127. Discussion, 141.
